(c) Safety is the prime concern on Indian Railways and all possible steps are taken to prevent accidents. These measures include adoption of suitable and modern technologies for interlocking and signalling systems upgradation of standards of track and rolling stock, modernization of maintenance practices, replacement of overaged assests, upgradation of training aids like simulators, checks on observance of safety precautions and provision of Anti Collision Device. A Corporate Safety Plan (2003—2013) has also been prepared and is followed.

Steps taken to prevent accidents at level crossing include, manning of unmanned level crossings, interlocking, provision of telephones and other safety aids at the manned level crossings, drives to check alertness of gatemen and train drivers, and education of road users, particularly at unmanned level crossings. Over Bridges/Under Bridges are provided on cost sharing basis in lieu of level crossings with heavy road and rail traffic, in consultation with the concerned State Governments, as per extant rules.
